

PHYSICS DAY

@ KSU-MARIETTA CAMPUS
MARCH 17TH, 2018
9:00AM TO 1:00PM
FREE OF CHARGE

Umbra Visible Light Wave X-Ray

Young's Double Slit -459.67 °F OK -273.15 °C Absolute Zero

The Department of Physics at Kennesaw State University would like to invite you to our annual Physics Day! We are very excited to offer young brilliant minds the opportunity to experience great displays of science and knowledge. We will have several displays set up for all to come by and observe as we demonstrate novel experiments. This is a great opportunity for younger students in the sciences.

The event will be held in the Physics Department, H 260 (830 Academic Building), of the Kennesaw State University Marietta campus. Parking will be available next to the building, and signs will be posted near the lots. The address and a campus map are available at <http://www.kennesaw.edu/maps/>

Registration begins at 9:00 am and the event ends at 1:00 pm. You can bring your child any time during this time interval as the events will be rotating. As the parent of your elementary/middle school student, we ask that you pre-register at https://kennesaw.co1.qualtrics.com/jfe/preview/SV_8fhVgfpKnJiif77?Q_CHL=preview

According to the KSU policy all minors must be accompanied by parents at all time. Let us know how many students will be attending. On-site registration is also available. Physics Day is hosted by the Society of Physics Students and the Department of Physics at Kennesaw State University. If you have any further questions or concerns, please email us. Thank you,

Dr. Kisa S. Ranasinghe (kranasin@kennesaw.edu)
 Department of Physics Kennesaw State University.

Tony Niebank, (aniebank@students.kennesaw.edu)
 Physics Day Student Coordinator
