

The Out Teach Professional Learning Community Unlocks Student Performance

Hands-on outdoor learning is proven to accelerate and deepen student comprehension, improve long-term recall, and increase engagement. Out Teach equips teachers to use the outdoors to give students access to exciting, real-world experiences, weaving critical STEM, literacy, and 21st Century skills, such as critical thinking and collaboration, into every school day.

The Out Teach Professional Learning Community empowers elementary educators to use existing outdoor spaces to bring learning to life, integrate Science across subject areas, and inspire students of all backgrounds with authentic hands-on learning, adding meaning and context to every subject, and sparking students' love of learning and discovery.

- **National Network of Educators** – Join a supportive and collaborative network of educators to learn specific strategies to incorporate outdoor learning into instruction.
- **Virtual Meetings** – Out Teach hosts six virtual meetings per school year plus ongoing support and collaborative opportunities in between sessions.
- **Outdoor Space Activation** – Year-long professional development helps teachers use any campus outdoor space to create high-quality, engaging learning experiences.
- **Experienced Instructors** – Out Teach Master Teachers help participants identify and implement effective and innovative instructional strategies that help unlock student performance and spark a love of STEM.
- **Community of Support** – Cultivates a long-term teacher-to-teacher network of support.

95%
of students taught by Out Teach-trained educators are highly engaged in learning
