

# Camp Invention® 2020

Your students will **discover the power of their imagination** in an **easy to implement, parent-paid program** where there is no cost to the school, at all.

**Your teachers** facilitate and receive a stipend as well as embedded professional development.

### **Summer 2020 Curriculum includes:**

- **C. I. Champions™** Discover the silent champions of the sports world and explore how these innovators have changed the way we play, view, and experience sports!
- **Design Thinking Project™** Take on the role of a designer to discover the power of imagination through the C. I. Design Thinking Process™. Exposure to intellectual property and entrepreneurship brings an understanding of how to own one's ideas and then take them to market.
- **C. I. Flight Lab™** Travel beyond the horizon as dreams take flight fueled by some of the greatest innovators of aviation. LINK, a robotic trainer, becomes the guide while soaring through daily challenges and logging air miles to complete an important mission.
- **Rescue Squad™** Join the Rescue Squad—a group of highly-trained operatives are empowered to solve environmental problems using their prior experiences and sustainable resources to impact change and save animal habitats.
